

Sustainable Packaging by SKY-LIGHT

Manufacturer of plastic packaging and foil for more than 50 years

By Inge Nielsen and Jesper Brødsgaard

Food Processing for the Future Conference – Middelfart, Denmark

16th January 2020

SKY-LIGHT

'Sustainable Packaging'

- what does it mean...?

Product development

How is the product designed?

Raw material

What material does the product consist of?

What is the origin of the raw material?

Production

How is the product manufactured?

Waste

How is the product disposed after use?

Could plastic packaging be a sustainable solution...?

“Some look at plastic manufacturers like us as a part of the world’s problems with plastic. We rather consider ourselves as a part of the solution with focus at circular recycling and energy optimization.”

Søren Kjær Larsen, CEO - SKY-LIGHT A/S

This reality is a huge problem
– but is plastic as material responsible for this...?

Coconut

Paper cup

The answer is **NO**...

This is not a problem to blame one material only – this is a behavioral problem.

All trash – no matter the material – is harmful to the nature.

Glass jar

Aluminum can

Why consider plastic packaging?

- because of its unique capabilities...

Extends food shelf life to minimize food waste.

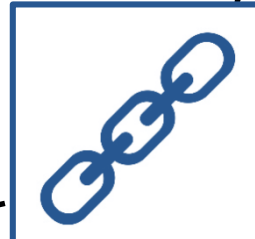

Minimizes product weight to minimize CO₂ emissions through distribution.

Circular recyclable to minimize use of virgin and natural resources.

Strong and durable to minimize risk of damage and contamination.

Does other materials have the same unique capacities...?

SKY-LIGHT presents:

PLASTIC - A SUSTAINABLE SOLUTION

Packaging of up to 100% recycled material

- a sustainable choice for the future...

- ✓ 100% approved for food contact
- ✓ 100% transparent – or any other colour
- ✓ 100% recyclable – PET - monomaterial
- ✓ Package design for maximizing strength and minimizing plastic consumption
- ✓ EFSA compliance regarding Post-consumer-Waste for food contact

Sustainable Products require Sustainable Production

- more than 30 years of experience with recycling of plastic...

- More than 85% of our raw material consists of recycled material
- No waste production – reuse or recycling of residual products
- No harmful chemicals
- ISO 50001 certified within Energy Management
– continuous energy optimization
- Operation Clean Sweep Partner
– protection of our surrounding environment

We are SKY-LIGHT

- much more than just another manufacturer of plastic

- Integrated production of PET
 - co-extrusion of foil and termoforming packaging at same site
- More than 30 years of experience by delivering to some of the most demanding food companies in Europe
- Customized product design with great focus at recycling
- Close recycling loops with our customers to recycle production waste
- Certifications:
 - ISO 9001:2015
 - ISO 50001:2011
 - BRC IoP Issue 5

We are **SKY-LIGHT**

We would like to grow. But we always want to be better.

We would like to lead the way. But we never run without direction.

Everything we do must create value.

We call this "meaningful development"

For our customers - for SKY-LIGHT - for the future...
